

INTRODUCTION:

Formed in 2005, Brothers Steel Industry LLC, works over a wide range of manufacturing activities. Our manufacturing facility of 300000 sq. feet area with expert manpower is based at Jurf Industrial area, Ajman. Our production capacity exceeds 50000 tons per annum. We are one of the leading manufacturers of scaffolding in the region, having the manufacturing facility for Cup-lock Scaffolding, Aluminium Scaffolding, Roofing Sheets & Sandwich Panels and Cable Management System. We also have Structural Steel Fabrication as the new addition to our business. Our rental division deals with Cup-lock Scaffolding and Aluminium Scaffolding. In addition, we have a trading division for Aluminium Profiles and Glass, which are used for Doors, Windows & Façade works.

We have a highly skilled and qualified team of CAD designers and Engineers, to cater the requirements of our customers all over GCC, Africa and Europe. We are accredited to ISO 9001:2015 certification and follow the latest international standards and continuously upgrade R&D activities and infrastructure to comply with the latest standards.

STEEL STRUCTURE FABRICATION:

As the application of the structural steel building are vast and in order to meet the market requirements, we introduced the Steel Structure Fabrication division to our business. Our highly qualified Designers and Engineers are experts in design & detailing of structures, like: Warehouses, Factories, Showrooms, Shopping Malls, Go downs, Workshops, Cold Stores, Supermarkets, Labor Camps, etc. The steel structure works starting from the fixing of Anchor bolts up to the installation of mezzanine floor and roofing.

We are one of the leading Structural Steel Fabrication industries in the region, based at Ajman, UAE. We undertake Structural Designs, Fabrication, and Erections of Steel Structures, Modification of Steel Structures, and Miscellaneous Metal Works etc. Our production & fabrication factory is in the Jurf Industrial Area, Ajman, having a total area of 300000 sq. feet, which accommodates manufacturing spaces for Steel Scaffolding, Aluminium Scaffolding and Cable Management system, along with Roofing & Wall Panel and Steel Structural Fabrication facilities. This large area helps us to cater the requirements of large-scale fabrication projects. In this area, we have Laser Cutting Machines for cutting the plates for structural steel works. We also have machines for Shearing, Bending, Notching, Welding, Drilling, Blasting, etc. Our Protective Coating procedure for structural steel members include initial primer coating and two layers of paint coatings. Most of the painting works are done using spray painting equipment. We take utmost care in handling the materials, for which we are using our Forklifts and boom loaders. For loading the plates to the Laser cutting machine, we use our Electric overhead travelling crane.

Our major scope of works includes but not limited to Structural steel fabrication, Warehouse Storage solutions, Mezzanine floors, Staircases, Handrails, Metal roofing, Wall panels, Structural steel canopies, Steel fences, Sliding Doors, Cat ladders, etc.
